GENERAL INDEX.

All reading matter in THE JOURNAL from January to June, inclusive, 1906, is indexed here. (For Current Medical Literature Index see pages 2050 to 2092.) All societies, congresses, etc., are grouped under the general subject of "Societies" at the end of the letter "S." Similarly, all "Deaths" and all "Book Notices" are indexed under those titles at the ends of the letters "D" and "B," respectively. Matter pertaining to the Association is under "Association News." With the above exceptions, all matter is indexed under the most important word of the heading that was used in THE JOURNAL. It is, therefore, well to remember that in looking up a certain subject, related words should be consulted, for example, nostrum, patent-medicine, proprietaries, proprietary medicines. The letters used to explain in which department the matter indexed appeared are as follows: "E", editorial; "O", original article; "T", therapeutics; "P", pharmacology; "Ml", medicolegal; and "ab" denotes an abstract of an article that has appeared in full elsewhere.

CURRENT MEDICAL LITERATURE

INDEX OF TITLES

Explanation: The reading matter which appeared in THE JOURNAL is not indexed here, except the original articles and the abstracts of original articles. This index includes the titles and the subjects of original articles published in the leading medical journals of the world during the past six months. The titles and the names of the journals in which they appeared were published weekly in the Current Medical Literature Department, to which references are made. The figures in parentheses refer to the paragraph; the number following, to the page in THE JOURNAL. For instance, "Hernia, results of operation for radical cure of, (12) 1402—ab" refers to page 1402 of THE JOURNAL, on which is found opposite paragraph 12 the title of the paper and the name of the author, viz., "Results of Operation for Radical Cure of Hernia. J. Hutchinson." This title is listed under the journal in which the article appeared, *The Lancet*, London, April 7. The "ab" indicates that an abstract of the article appeared in THE JOURNAL, which will be found below the title on page 1402. Titles of articles which appeared in THE JOURNAL are indicated in the index below by an asterisk (*) before the page number. For instance, "Calculus, Diagnosis of Renal, *851," refers to page 851 of THE JOURNAL, on which is found the following: "The Diagnosis of Renal Calculus. Guy L. Hunner." Index to authors of all the articles below is on pages 2080 to 2092 of this index.

CURRENT MEDICAL LITERATURE

INDEX OF AUTHORS

In this index are the names of the authors of articles which have appeared in THE JOURNAL of the American Medical Association and of articles which have been listed from week to week in the Department of Current Medical Literature as having appeared in other journals. Thus it practically includes the names of all who have published articles in the leading journals of the world during the past six months. The * preceding the page reference indicates that the article appeared in full in THE JOURNAL. The numbers in parentheses indicate the numbered paragraphs on the page referred to. The numbers not in parentheses indicate pages.
